

State of Hawaii 2011 Reapportionment Commission  
Summary of Proposed Plan for the State House of Representatives

Proposed plan adopted by the Commission 08/05/11

Basic Island Unit of Hawaii Population Target 26,440

House District 1 population of 26,762 is 1.22% above the target population.

House district 1 had population increase from the 2001 redistricting of 21,646 to its 2010 population of 23,257. To meet the proposed target population, House district 1 needed to increase in size.

House District 2 population of 26,446 is 0.02% above the target population.

House district 2 had population increase from the 2001 redistricting of 22,334 to its 2010 population of 23,279. To meet the proposed target population, House district 2 needed to increase in size.

House District 3 population of 26,032 is -1.54% below the target population.

House District 3 had population increase from the 2001 redistricting of 20,871 to its 2010 population of 23,425. To meet the proposed target population, House district 3 needed to increase in size.

House District 4 population of 27,074 is 2.40% above the target population.

House district 4 had population increase from the 2001 redistricting of 22,141 to its 2010 population of 33,276. To meet the proposed target population, House district 4 needed to decrease in size.

House district 5 had population increase from the 2001 redistricting of 21,430 to its 2010 population of 27,586. To meet the proposed target population, House district 5 needed to decrease in size.

House District 6 population of 26,424 is -0.06% below the target population.

House district 6 had population increase from the 2001 redistricting of 20,152 to its 2010 population of 26,582. To meet the proposed target population, House district 6 needed to decrease in size.

House District 7 population of 26,188 is -0.95% below the target population.

House district 7 had population increase from the 2001 redistricting of 20,103 to its 2010 population of 27,674. To meet the proposed target population, House district 7 needed to decrease in size.

Total deviation for the Basic Island Unit of Hawaii is 3.94%.

#### County of Maui Population Target - 25,821

House District 8 population of 26,928 is 4.29 above the target population.

House district 8 had population increase from the 2001 redistricting of 20,637 to its 2010 population of 27,894. To meet the proposed target population, House district 8 needed to decrease in size.

House District 9 population of 27,045 is 4.74 above the target population.

House District 9 had population increase from the 2001 redistricting of 22,051 to its 2010 population of 27,705. To meet the proposed target population, House district 9 needed to decrease in size.

House District 10 population of 24,585 is -4.79 below the target population.

House District 10 had population increase from the 2001 redistricting of 20,375 to its 2010 population of 24,585. House district 10's population fell within deviation limits and no changes were made.

House District 11 population of 24,863 is -3.71 below the target population.

House District 11 had population increase from the 2001 redistricting of 20,496 to its 2010 population of 24,916. House district 11's population fell within deviation limits and only a house keeping change was made to the district. The change included removing three large census blocks from district 11 and combining them with house district 12. The change will allow the population on the west side of Ulupalakua Hwy to vote in Ulupalakua rather than make the long drive to Kihei to vote. The population of the three census blocks is 53.

House District 12 population of 25,505 is -1.22 below the target population.

House District 12 had population increase from the 2001 redistricting of 22,350 to its 2010 population of 24,992. To meet the proposed target population, House district 12 needed to increase in size. The district includes the housekeeping change which was made to house district 11.

House District 13 population of 25,998 is 0.69 above the target population.

House District 13 had a population increase from the 2001 redistricting of 22,332 to its 2010 population of 24,832. To meet the proposed target population, House district 12 needed to increase in size.

Total deviation for the Basic Island Unit of Maui is 9.53%

#### Basic Island Unit of Kauai Population Target -22,364

The Technical Committee is proposing no changes to the existing representative district lines for the Basic Island Unit of Kauai. It is anticipated the Technical Committee will receive recommendations from the Kauai Advisory Council during the comment and public hearing period.

House District 14 population of 22,810 is 1.99% above the target population.

House District 15 population of 23,128 is 3.42% above the target population.

House District 16 population of 21,153 is -5.41% below the target population.

Total deviation for the Basic island unit of Kauai is 8.83%.

#### Basic Island Unit of Oahu Population Target – 27,234

House District 17 population of 27,853 is 2.27% above the target population.

House district 17 had population increase from the 2001 redistricting of 22,233 to its 2010 population of 24,650. To meet the proposed target population, House district 17 needed to increase in size.

House District 18 population of 26,947 is -0.05% below the target population.

House district 18 had population increase from the 2001 redistricting of 21,777 to its 2010 population of 22,281. To meet the proposed target population, House district 18 needed to increase in size.

House District 19 population of 26,610 is -2.29% below the target population.

House district 19 had population increase from the 2001 redistricting of 21,865 to its 2010 population of 22,819. To meet the proposed target population, House district 19 needed to increase in size.

House District 20 population of 26,933 is -1.11% below the target population.

House district 20 had population decrease from the 2001 redistricting of 22,404 to its 2010 population of 22,303. To meet the proposed target population, House district 20 needed to increase in size.

House District 21 population of 27,855 is 2.28% above the target population.

House district 21 had population increase from the 2001 redistricting of 23,562 to its 2010 population of 25,009. To meet the proposed target population, House district 21 needed to increase in size.

House District 22 population of 26,111 is -4.12% below the target population.

House district 22 had population increase from the 2001 redistricting of 23,542 to its 2010 population of 25,101. To meet the proposed target population, House district 22 needed to increase in size. This was accomplished by redrawing

House District 23 population of 26,620 is -2.25% below the target population.

House district 23 had population increase from the 2001 redistricting of 23,114 to its 2010 population of 27,871. House district 23 needed to increase in size. This was accomplished by redrawing

House District 24 population of 27,276 is 0.15% above the target population.

House district 24 had population increase from the 2001 redistricting of 23,626 to its 2010 population of 24,566. To meet the proposed target population, House district 24 needed to increase in size.

House District 25 population of 26,400 is -3.06% below the target population.

House district 25 had population increase from the 2001 redistricting of 23,276 to its 2010 population of 24,157. To meet the proposed target population, House district 25 needed to increase in size.

House District 26 population of 26,303 is -3.42% below the target population.

House District 26 had population increase from the 2001 redistricting of 23,574 to its 2010 population of 23,885. To meet the proposed target population, House district 26 needed to increase in size.

House District 27 population of 26,858 is -1.38% below the target population.

House District 27 had population increase from the 2001 redistricting of 21,955 to its 2010 population of 22,712. To meet the proposed target population, House district 27 needed to increase in size to meet the population target.

House District 28 population of 27,917 is 2.51% above the target population.

House District 28 had a population increase from the 2001 redistricting of 24,595 to its 2010 population of 28,739. To meet the proposed target population, House district 28 needed to decrease in size to meet the population target.

House District 29 population of 27,613 is 1.39% above the target population.

House District 29 had a population increase from the 2001 redistricting of 23,186 to its 2010 population of 24,867. To meet the proposed target population, House district 29 needed to increase in size to meet the population target.

House District 30 population of 26,864 is -1.36% below the target population.

House District 30 had a population increase from the 2001 redistricting of 22,897 to its 2010 population of 23,965. To meet the proposed target population, House District 30 needed to increase in size to meet the population target.

House District 31 population of 27360 is 0.46% above the target population.

House district 31 had population decrease from the 2001 redistricting of 24,532 to its 2010 population of 24,482. To meet the proposed target population, House district 31 needed to decrease in size.

House District 32 population of 28,127 is 3.28% above the target population.

House district 32 had population increase from the 2001 redistricting of 48,815 to its 2010 population of 45,921. To meet the proposed target population, House district 32 needed to decrease in size. This was accomplished by redrawing

House District 33 population of 27,421 is 0.69% above the target population.

House district 33 had a population decrease from the 2001 redistricting of 24,024 to its 2010 population of 23,738. House district 33 needed to increase in size.

House District 34 population of 27,763 is 1.94% above the target population.

House district 34 had population increase from the 2001 redistricting of 25,279 to its 2010 population of 26,009. To meet the proposed target population, House district 34 needed to increase in size.

House District 35 population of 27,291 is 0.21% above the target population.

House district 35 had population increase from the 2001 redistricting of 23,384 to its 2010 population of 26,288. To meet the proposed target population, House district 35 needed to increase in size.

House District 36 population of 26,978 is -1.60% below the target population.

House district 18 had population increase from the 2001 redistricting of 22,347 to its 2010 population of 22,835. To meet the proposed target population, House district 36 needed to increase in size.

House District 37 population of 28,172 is 3.44% above the target population.

House district 37 had population decrease from the 2001 redistricting of 24,851 to its 2010 population of 23,503. To meet the proposed target population, House district 37 needed to increase in size.

House District 38 population of 28,562 is 4.88% below the target population.

House district 38 had population increase from the 2001 redistricting of 25,174 to its 2010 population of 34,181. To meet the proposed target population, House district 38 needed to decrease in size.

House District 39 population of 28,439 is 4.42% above the target population.

House district 39 had population increase from the 2001 redistricting of 23,850 to its 2010 population of 26,961. To meet the proposed target population, House district 39 needed to increase in size.

House District 40 population of 28,502 is 4.66% above the target population.

House district 40 had population increase from the 2001 redistricting of 25,366 to its 2010 population of 39,045. To meet the proposed target population, House district 40 needed to decrease in size. This was accomplished by redrawing

House District 41 population of 27,942 is 2.60% above the target population.

House district 41 had a population increase from the 2001 redistricting of 23,839 to its 2010 population of 27,009. To meet the proposed target population, House district 41 needed to increase in size.

House District 42 population of 27,118 is -0.43% below the target population.

House district 42 had population increase from the 2001 redistricting of 22,580 to its 2010 population of 26,615. To meet the proposed target population, House district 42 needed to increase in size.

House District 43 population of 27,675 is 1.62% above the target population.

House district 43 had population increase from the 2001 redistricting of 27,405 to its 2010 population of 43,932. To meet the proposed target population, House district 43 needed to decrease in size.

House District 44 population of 26,194 is -3.82% below the target population.

House district 44 had population increase from the 2001 redistricting of 22,281 to its 2010 population of 26,514. To meet the proposed target population, House district 44 needed to decrease in size.

House District 45 population of 27,610 is 1.38% above the target population.

House district 45 had population increase from the 2001 redistricting of 21,732 to its 2010 population of 25,150. To meet the proposed target population, House district 45 needed to increase in size. This was accomplished by redrawing

House District 46 population of 28,177 is 3.46% above the target population.

House district 46 had population decrease from the 2001 redistricting of 43,392 to its 2010 population of 42,821. To meet the proposed target population, House district 46 needed to decrease in size. This was accomplished by redrawing

House District 47 population of 26,483 is -2.76% below the target population.

House district 47 had population increase from the 2001 redistricting of 23,932 to its 2010 population of 26,644. To meet the proposed target population, House district 47 needed to decrease in size.

House District 48 population of 25,922 is -4.82% below the target population.

House district 48 had population decrease from the 2001 redistricting of 23,933 to its 2010 population of 23,747. To meet the proposed target population, House district 48 needed to increase in size.

House District 49 population of 26,284 is -3.49% below the target population.

House district 49 had population increase from the 2001 redistricting of 22,169 to its 2010 population of 22,323. To meet the proposed target population, House district 49 needed to increase in size.

House District 50 population of 26,452 is -2.87% below the target population.

House district 50 had population decrease from the 2001 redistricting of 33,783 to its 2010 population of 30,943. To meet the proposed target population, House district 50 needed to decrease in size.

House District 51 population of 26,755 is -1.76% below the target population.

House district 51 had population decrease from the 2001 redistricting of 21,882 to its 2010 population of 21,621. To meet the proposed target population, House district 51 needed to increase in size.

Total deviation for the Basic island unit of Oahu is 9.70%.
